

SODIUM DICHLOROISOCYANURATE DIHYDRATE**ICSC: 1785 (December 2022)**

Troclosene sodium, dihydrate

Dichloroisocyanuric acid sodium salt dihydrate

1,3,5-Triazine-2,4,6-(1H,3H,5H)-trione, 1,3-dichloro-, sodium salt, dihydrate

CAS #: 51580-86-0**UN #: 2465****EC Number: 220-767-7**

	ACUTE HAZARDS	PREVENTION	FIRE FIGHTING
FIRE & EXPLOSION	Gives off irritating or toxic fumes (or gases) in a fire. Risk of fire and explosion on contact with reducing agents, water or many substances. See Chemical Dangers.	NO contact with incompatible substances.	Use water in large amounts. NO carbon dioxide, powder. In case of fire: keep drums, etc., cool by spraying with water. NO direct contact with water.

PREVENT DISPERSION OF DUST!

	SYMPTOMS	PREVENTION	FIRST AID
Inhalation	Cough. Sore throat.	Use local exhaust or breathing protection.	Fresh air, rest. Refer for medical attention.
Skin	Redness. Pain.	Protective gloves. Protective clothing.	Remove contaminated clothes. Rinse skin with plenty of water or shower. Refer for medical attention if skin irritation occurs. See Notes.
Eyes	Redness. Pain. Severe burns.	Wear safety goggles or eye protection in combination with breathing protection if powder.	Rinse with plenty of water for several minutes (remove contact lenses if easily possible). Refer immediately for medical attention.
Ingestion	Sore throat. Burning sensation.	Do not eat, drink, or smoke during work.	Rinse mouth. Do NOT induce vomiting. Give one or two glasses of water to drink. Refer for medical attention.

SPILLAGE DISPOSAL	CLASSIFICATION & LABELLING
Personal protection: face shield and particulate filter respirator adapted to the airborne concentration of the substance. Do NOT let this chemical enter the environment. Sweep spilled substance into covered dry containers. Carefully collect remainder. Then store and dispose of according to local regulations. Do NOT absorb in saw-dust or other combustible absorbents.	According to UN GHS Criteria  DANGER Harmful if swallowed Causes skin irritation Causes serious eye damage May cause respiratory irritation Toxic to aquatic life with long lasting effects Transportation UN Classification UN Hazard Class: 5.1; UN Pack Group: II
STORAGE	
Store only in original container. Separated from incompatible materials. See Chemical Dangers. Fireproof. Well closed. Dry. Provision to contain effluent from fire extinguishing. Store in an area without drain or sewer access.

SODIUM DICHLOROISOCYANURATE DIHYDRATE**ICSC: 1785****PHYSICAL & CHEMICAL INFORMATION****Physical State; Appearance**

WHITE POWDER WITH PUNGENT ODOUR.

Physical dangers**Chemical dangers**

Decomposes on heating and on contact with water. This produces toxic gases including chlorine (see ICSC 0126). Reacts violently with hypochlorites, alkaline compounds, acids and water. This generates fire and explosion hazard.

Formula: C₃H₄Cl₂N₃NaO₅

Molecular mass: 256

Decomposes at > 240°C

Density (at 20°C): 0.96 g/cm³

Solubility in water, g/100ml at 25°C: 25 (freely soluble)

EXPOSURE & HEALTH EFFECTS**Routes of exposure**

The substance can be absorbed into the body by inhalation of dust and by ingestion.

Effects of short-term exposure

The substance is corrosive to the eyes. The substance is irritating to the skin and possibly the respiratory tract.

Inhalation risk

A nuisance-causing concentration of airborne particles can be reached quickly when dispersed, especially if powdered.

Effects of long-term or repeated exposure

Repeated or prolonged contact with skin may cause dermatitis.

OCCUPATIONAL EXPOSURE LIMITS**ENVIRONMENT**

The substance is very toxic to aquatic organisms. The substance may cause long-term effects in the aquatic environment. It is strongly advised not to let the chemical enter into the environment.

NOTES

See ICSC 0126.
